EFFICIENCY, SAFETY and NOTES

- ✓ **RELIABILITY AND SAFETY** are guaranteed by a **COPPER BOILER**. Copper is an explosion-proof and antiscaling material. The **HEATERS** are placed externally, so they **NEVER** come into contact with water.
- ✓ **1 KW power** creates a steam flow equal to 1,2 kg/h (20 g/min). The efficiency of steam is proportional to its flow, not to its pressure. There is no point in having high pressure and a low flow.
- ✓ The whole production is based in Italy, in our plant in Pesaro.
