Magic Vapor Sani is a steam cleaning machine equipped with a device able to sanitize surfaces by using dry steam and nebulizing steam together with the **sanitizing liquid (ref. RIP1519), alcohol 70%, hydrogen peroxide 1% (test carried out by laboratories).**

The disinfection process is very quick and it is not necessary to rinse or wipe with a cloth. Our sanitizing detergent is VOC free (it does **not** contain **harmful** volatile organic compounds), so it can be used not only by skilled staff and contractors but also by common people.

Furthermore, by nebulizing the disinfectant detergent together with steam, you can get a lower **consumption** of detergent and a **faster sanitization**.

Practical and user-friendly:

suitable for sanitizing emergency vehicles, ambulances, offices, medical and dental offices, retirement homes, shops and much more!

EFFICIENCY, SAFETY and NOTES

- ✓ RELIABILITY AND SAFETY are guaranteed by a COPPER BOILER. Copper is an explosion-proof and antiscaling material. The HEATERS are placed externally, so they NEVER come into contact with water.
- ✓ 1 kW power creates a steam flow equal to 1,2 kg/h (20 g/min). The efficiency of steam is proportional to its flow, not to its pressure. There is no point in having high pressure and a low flow.
- ✓ The whole production is based in Italy, in our plant in Pesaro.
